

Map data files included on github in the map_data_files folder:

Data file name: buck_wma.kml

- Data use: Used to map the South Llano River State Park land that previously belonged to the Walter Buck WMA
- Map(s) used in:
 - Figure 2.5. South Llano River State Park and Texas Tech Center at Junction land parcels.
- Year data was downloaded: 2026
- Link to where data was obtained from: N/A
- Additional information about how data was obtained if applicable: File was created from polygons drawn on Google Earth according to a comparison of the current South Llano River State Park boundaries and the old boundaries as shown by CalTopo as of 2026

Data file name: junc_5_fix.kml

- Data use: Used to map the five land parcels belonging to the Texas Tech Center at Junction
- Map(s) used in:
 - Figure 2.1. Geology of the South Llano River State Park and Texas Tech Center at Junction.
 - Figure 2.2. Soils of the South Llano River State Park and Texas Tech Center at Junction.
 - Figure 2.5. South Llano River State Park and Texas Tech Center at Junction land parcels.
 - Figure 3.1. Abundance transect start points.
- Year data was downloaded: 2026
- Link to where data was obtained from: N/A
- Additional information about how data was obtained if applicable: File was created from polygons drawn on Google Earth according to the boundaries shown in a map of TTU Center at Junction boundaries via email correspondence from Director Robert Stubblefield

Data file name: slr_ttj_selected_points.kml

- Data use: Used to map the transect start points at both the South Llano River State Park and the Texas Tech Center at Junction
- Map(s) used in:
 - Figure 3.1. Abundance transect start points.
- Year data was downloaded: 2026
- Link to where data was obtained from: <https://caltopo.com/m/3Q0PRK0>
- Additional information about how data was obtained if applicable:

Data files not included on github due to file size and ease of access at included links. Contact the author Gwendolyn Watt for the same files used for mapping.
